## SK-8

### HD FULLY-AUTO SELF-RETRACTING KNIFE

Cuts safely through foam/polystyrene, card, tape, bagged goods, and more. It features a metal-reinforced rounded head, a comfortable, non-slip, ergonomic handle and a self-retracting mechanism that cannot be overridden by the user.

## SK-7

### COMPACT SELF-RETRACTING SAFETY KNIFE

Lightweight and safe to carry in your pocket. It features a spring-activated blade that automatically retracts when lifted from a cutting surface, preventing injuries from occurring.

## SK-5

### SELF-RETRACTING SAFETY KNIFE

Safely cuts through a range of packaging, including boxes, tape, and shrink wrap. Features a spring-activated blade that retracts when lifted from a cutting surface, preventing injuries from occurring.

## SK-4

### SELF-RETRACTING SAFETY KNIFE

Handles a wide variety of unpacking tasks. Features a spring-activated blade that retracts when lifted from a cutting surface, preventing injuries from occurring. Also comes with a rugged and robust handle.

## SK-15

### CONCEALED BLADE CUTTER

Its stainless steel blades make it ideal for safely opening cartons, cutting stretch wrap film, plastic strapping, tape slitting, and more. NSF approved and can easily be washed and sanitised with sodium hypochlorite.

## DC-2

### ORIGINAL BLADE DISPOSAL CASE

The perfect solution to snap, store and dispose of used blades and snapped blade segments. Metal slot easily snaps off extra heavy-duty blades and automatically stores them safely inside.

## DC-5

### ADVANCED BLADE DISPOSAL HOLSTER

Compact size with a clip-on feature. All snapped blunt blades are stored securely away, preventing the risk of injury from occurring. Can be worn on a belt to make repetitive blade snapping easier.

## DC-6

### DESKTOP BLADE DISPOSAL SYSTEM

3-in-1 product; a blade snapper, disposal case, and knife stand. It works well with both 9mm and 18mm blades. It features a transparent plastic disposal container with several guides displayed on the front.
